

# Is a vCISO Right for Your Organization?

## Determine Your Next Step with Confidence

Whether you're scaling, staying lean, or preparing for increased regulatory pressure, your answers will help you understand whether a full-time CISO, a virtual CISO (vCISO), or a hybrid advisory model may be appropriate.

*This assessment is informational and advisory in nature.*

### vCISO Advisory Model May Be a Strong Fit

Your organization may benefit from executive-level cybersecurity advisory leadership without the cost or commitment of a full-time hire.

*RSI Security's vCISO services are designed to support informed decision-making while your organization retains control over implementation and operations.*

### A Hybrid Cybersecurity Leadership Model

You've made progress but may still have gaps in cybersecurity leadership, program maturity, or compliance readiness.

A hybrid approach — combining internal resources with vCISO advisory support — can offer flexibility while strengthening governance, risk visibility, and executive alignment.

*RSI Security can help design a hybrid advisory model aligned to your goals, risk profile, and budget.*

### You May Benefit from a Full-Time CISO

Your organization is growing or operating in a regulated environment and may benefit from dedicated, in-house executive-level cybersecurity leadership to provide ongoing strategic direction, governance oversight, and program ownership.

*RSI Security can help support this transition through advisory guidance, leadership augmentation, or interim vCISO support.*

*Disclaimer: This assessment is for informational and advisory purposes only and does not constitute a compliance determination, risk rating, or assurance opinion. RSI Security's vCISO services are advisory in nature; clients retain responsibility for implementation, operation, and compliance decisions.*
